

AADK Task 3 Report

Design Your First App Idea (Concept + UI Sketch)

Name: Cinmay L

Course Title: Android App Development

Date: February 16, 2026

Contents

1	App Concept Creation	2
2	UI Sketch / Wireframe	3
3	Design Reflection	4
4	Optional Enhancement: Color Scheme & Typography	4

App Concept Creation

1.1 App Overview

App Name: FocusFlow

Purpose: FocusFlow helps students manage daily academic tasks efficiently by organizing assignments, deadlines, and reminders in one place.

Target Audience: College students and high school learners who want a simple productivity tool without distractions.

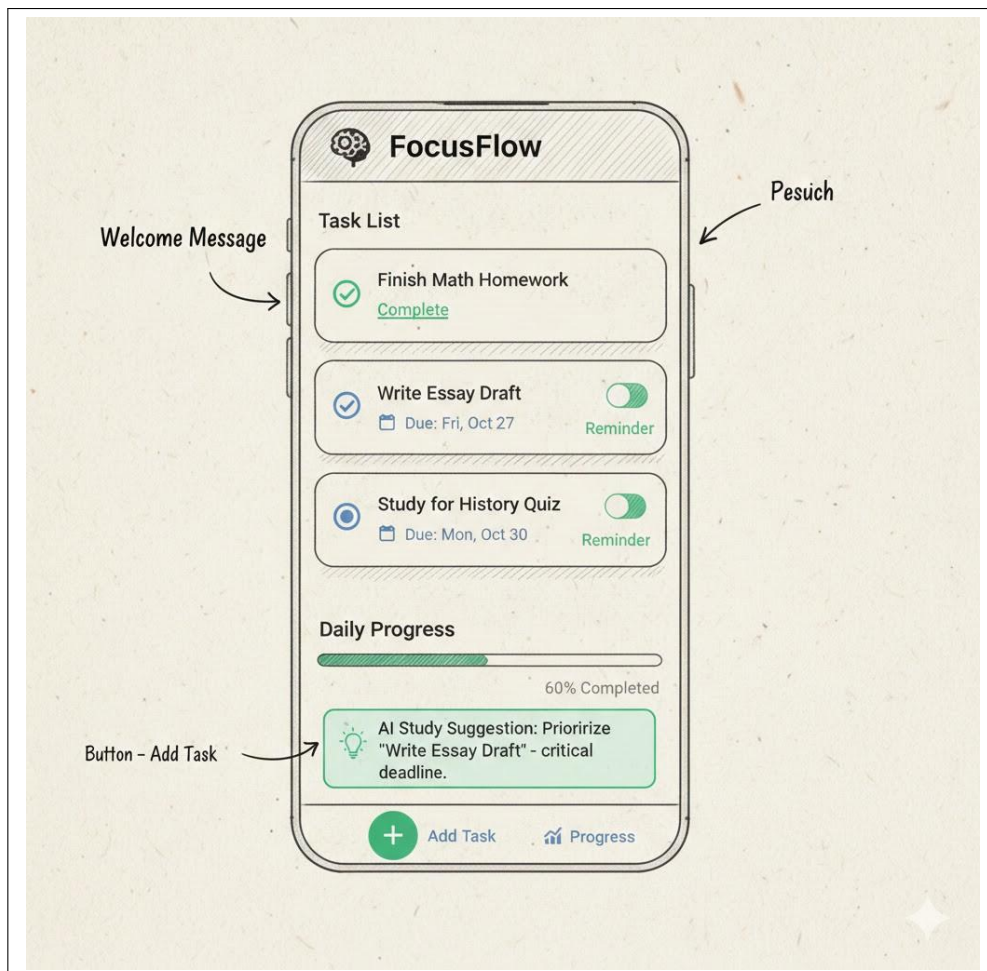

1.2 Core Features

- Task creation with deadline selection
- Daily progress tracker
- Smart reminders and notifications

Unique Feature: AI-based study suggestion that recommends task priority based on upcoming deadlines and workload.

UI Sketch / Wireframe

Main Screen Layout

UI Element Labels:

- Text – Welcome Message
- Column – Task List Layout
- Button – Add Task
- Button – View Progress
- Image – Motivational Illustration

Design Reflection

Reflection

I chose this app idea because students often struggle with organizing tasks and maintaining productivity. The design focuses on simplicity by minimizing clutter and prioritizing essential actions like adding tasks and viewing progress. A clean layout ensures ease of navigation and reduces cognitive overload. To build this interface using Jetpack Compose, I would likely use components such as **Column**, **Row**, **Text**, **Button**, and **Image**. These elements would help structure the layout efficiently while keeping the UI modern and responsive.

Optional Enhancement: Color Scheme & Typography

Design Theme

Color Scheme:

- Primary Color – Soft Blue (#4A90E2)
- Secondary Color – Light Gray (#F2F4F8)
- Accent Color – Fresh Green (#27AE60)

Typography:

- Headings – Sans-serif bold font
- Body Text – Clean and readable modern font

The selected colors aim to create a calm and focused atmosphere, enhancing productivity and readability.
